Design

The unique design of D, with rounded corners on top and below, makes for a very comfortable seating experience. D makes the difference due to its versatility. It is firm but lightweight, allowing you to rearrange your setting. Add it to your existing table or put it aside to have it at hand when you need an extra seat.

Pick D Plus, the new flexible seating solution in this family with upholstered wooden back and grasp first-hand what comfort is. As a convenient add-on, a rotatable tablet creates a useful surface for working or to rest a beverage.

Material

D family are available in a variety of textile and colour finishes. Visit matic.com.my/finishlibrary/ to see our complete textile and material offering.
