:

An elegant silhouette

Everything Elevated is the designer team behind the simple and sophisticated wooden bird, Swan, which is a sculptural decorative figure made of oak. Its simple shape creates both a majestic and understated expression, as well as adding character and personality to any modern interior.

Everything Elevated has created a design without any unnecessary details. Just like a pictogram, Swan comes across with a distinct, almost nonchalant posture inspired by the swan. Swan has a rounded plump body and a long straight neck with distinctive edges. With neither a feminine nor masculine expression, Swan looks distinguished scouting out in the room. The material selected adds a warm and natural element to the design. Swan is an unavoidable new collector's item.

As for the inspiration behind Swan, Everything Elevated says: "Nature has always been a source of inspiration for people, and natural elements are often used in interior design. Birds are particularly fascinating because they are intelligent and can form very strong emotional ties with people. The Swan wooden figure is a beautiful, dream-like swan. It is enigmatic. It is distinguished. And it is exquisite to touch! A simple, elegant and reticent swan all at once".

Swan is available in a classic black and white, and a beautiful natural wood version. Create a homey feeling by inviting the Swan wooden figure inside. Place Swan on the bedside table as a warm-hearted friend, allow it to welcome your guests in the hallway placed on a shelf or dresser, or let its graceful presence create cosy atmosphere in the living room.
