BEHIND EVERY  
GREAT DESIGN,

IS A TALE WORTH  
TELLING.

## INTRODUCTION

Nothing stays the same forever, least of all a business. The rapid pace of the modern marketplace requires - DEMANDS - paradigm shifts in the blink of an eye. It is crucial, therefore, for workplaces to be equally adaptable.

The M System by Matic Degree strives to fulfill this by providing a unique modular concept that is as versatile as it is scalable. Imagine an office that grows as your team grows, allowing room for improvement and transformation in an organic, structured manner.

This is space planning like you've never seen it before, one that caters not just to physical requirements, but fosters closer connection, better productivity, higher creativity, and ultimately, greater prosperity for all.

Essentially, an office that is a masterpiece in itself.

**SPACE CREATION,**  
**REIMAGINED**

# OPEN SPACES

MAKING WORK FLOW

An open space concept creates a work area that respects individuality while strengthening synergy and cooperation by promoting interaction, communication and engagement.

An uncluttered, spacious environment is also perfect for nurturing creativity and efficiency, breaking down barriers and allowing processes to flow. With no walls to divide individuals into silos, movement is inevitable, as is the open exchange of thoughts, opinions and ideas.

If need be, boundaries can still be established by differentiating personal and shared storage, all while maintaining a single-level, open-door atmosphere.

# SEMI-OPEN SPACES

BOUNDARIES FOR BOUNDLESS EXPLORATION

In today's dynamic workplaces, collaboration and co-creation are key; a balance between private and shared spaces is essential in facilitating group discussions as well as personal task management.

Companies with set hierarchies can benefit from a properly planned semi-open office concept that provides required boundaries without stifling free-flowing communication.

This revolves around establishing personal workstations punctuated by spaces for discussions, meetings and socialising, opening up opportunities for boundless productivity.

# CONTEMPORARY CUBICLES

SEPARATED YET CONNECTED

For larger organisations, or those that require more focused personal workstations for heightened productivity, adopting a contemporary cubicle concept could be crucial.

Such a concept would create clear zoning between personal and group-use spaces, with varying panel heights to provide marked separations between spaces.

Partitions may be used to create enclosed personal workspaces for those who need to focus on tasks at hand, while common areas are left more open and airy.

Meanwhile, shared storage compartments can be established for efficient access to inter-departmental information, while private and confidential documents can be kept in more personalised storage.

LOOK & FEEL

For desking solutions, the M System marries productivity spaces with personalised touches for inspiring spaces that embody brand image and culture.

Our modular system allows for infinite mix-and-match options, with different table leg profiles, colours and textures to create truly personalised yet cohesive environments that are as aesthetically pleasing as they are supremely functional.

## DESKING COLLECTIONS

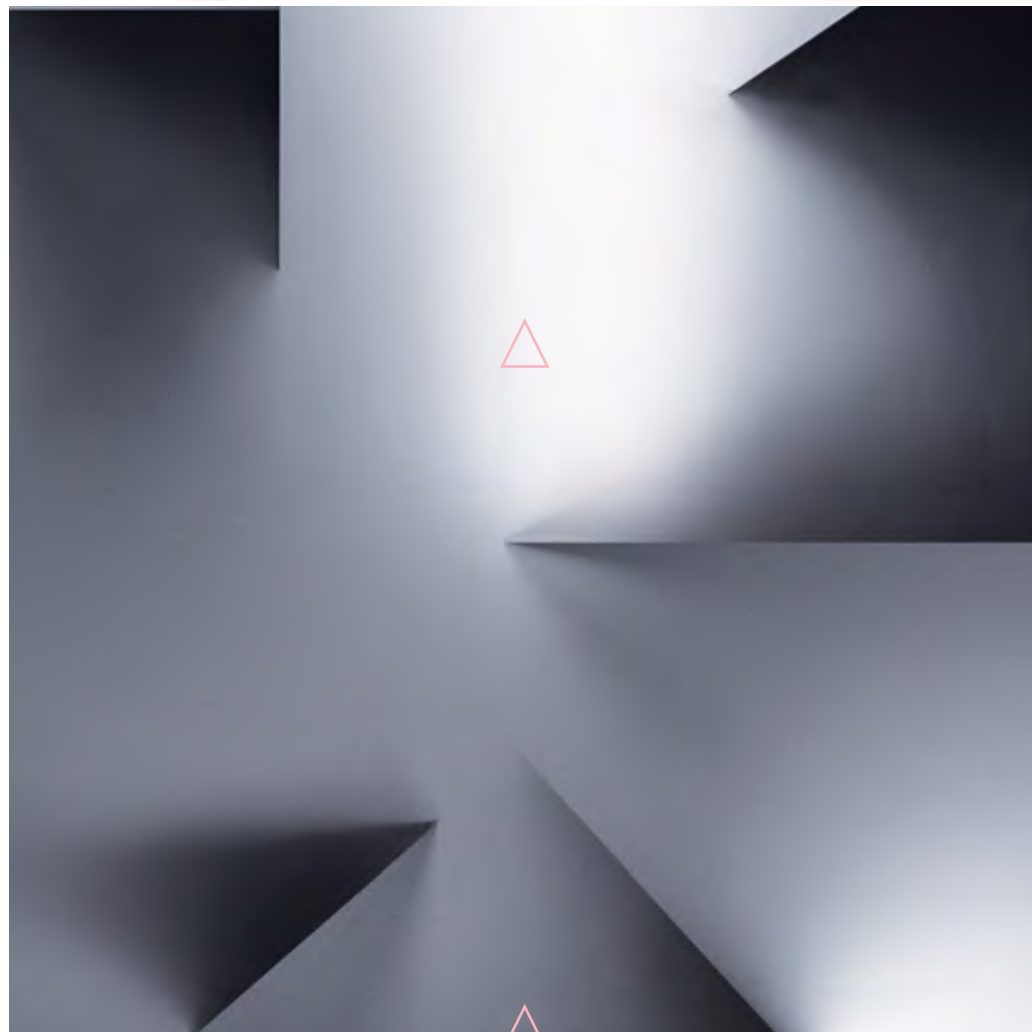

TOP OF THE RANGE  
DESKTOP TOUCHES

LOOK & FEEL

# MINIMALIST

DESKING COLLECTION  
**EDGE & FRAME**

The Edge and Frame Desking Collection embodies the essence of minimalism, providing a uniform, established look with a visual continuity expressed by vertical and horizontal lines.

This clean, classic and timeless design flows effortlessly into any modernist theme and furniture selection.

LOOK & FEEL

# FUTURISTIC

DESKING COLLECTION  
**FLO**

Inspired by the undulating movement of water, this futuristic desking collection brings to life a visually graceful and lightweight feel defined by smooth edges and a flowing design that adapts to tight spaces and awkward corners.

This collection comes with a distinctive advantage, whereby the legs may be installed at various angles; for instance, at a 30° angle, the beautiful lines are enhanced, while fitting them at 90° allows for more space for shelving and storage.

## INNOVATIVE SPACE PLANNING with TRANS 18/30/60/80

Trans 18/30/60/80 refers to a collection of panels that comes in three types of thickness — 30mm, 60mm and 80mm.

Trans 18 is a series of lightweight panels for clip-on use on table tops, offering employees the comfort of a visually segregated workspace whilst maintaining the connectivity of an open office.

Trans 30 is a series of lightweight, versatile panels that can be used to segregate spaces and create partitions for open and semi-open workplaces.

Meanwhile Trans 60 and 80 sturdy, heavy-duty panels that allow cabling raceways to be routed within them. Made with solid frames and finely engineered details, they are able to support lightweight cabinets, racks and other accessories for added functionality.

# TRANS 18

Trans 18 is a lightweight panel offering plug & play simplicity. Frameless and cutting a slim, elegant profile, they carve out individual work spaces to give employees the privacy and comfort to focus on delivering their best work.

The added privacy also enables workstations to be placed next to each other, saving space, and panel heights to be standardised at low levels, giving the feeling of spaciousness and cheerful airiness.

Trans 18 is fully tackable to allow individual personalisation and added functionality, and comes with in a wide range of colours to match any indoor theme.
